Dear [Decision Maker],

As a teacher at [School/District], I am writing to request approval for the use of Whiteboard.fi in our classrooms.

I have personally used the platform in my physical, in-person classroom and have seen firsthand the benefits it can provide to students and teachers alike.

In addition to the pedagogical benefits of Whiteboard.fi, I have also seen improvements in my students' learning and results. I have noticed that my students are more engaged and motivated when using the platform, and that they are able to better understand and retain the material being taught. This has translated into better grades and overall academic success for my students.

Whiteboard.fi offers a range of interactive features that allow teachers to deliver engaging, interactive instruction to their students. The platform has been an invaluable tool for enhancing the learning experience of my students, and I believe it has the potential to make a significant impact on the future success of our students. By providing them with the tools and resources they need to learn and grow, we can help them develop the skills and knowledge they need to thrive in the 21st century.

I urge you to consider approving the use of Whiteboard.fi for our school or district. I believe that the benefits it can provide to our students and teachers will more than justify the cost. If you have any questions or would like more information about the platform, please don't hesitate to reach out to me or the Whiteboard.fi team.

Further grounds for approval:
_____
_____
_____

Please indicate your approval or disapproval of this request below, and sign and date the document to indicate your decision.

[ ] Approved
[ ] Disapproved

Date: _____

Signature: _____   Position:_____

Sincerely,
[Your Name]
[Your School/District]

I understand that funding for new technology initiatives can be a concern, but I would like to bring to your attention the various sources of state and federal funding that may be available to support the implementation of Whiteboard.fi in our school or district. For example, the [State/Federal] Department of Education often provides grants and funding opportunities for schools and districts looking to implement digital initiatives, such as the use of Whiteboard.fi in the classroom. Additionally, many states have dedicated funds for the purchase of technology and other resources for schools, which may be used to support the implementation of Whiteboard.fi.

I encourage you to explore these and other sources of funding that may be available to support the implementation of Whiteboard.fi in our school or district. By leveraging these resources, we can ensure that our students and teachers have access to the tools and resources they need to succeed

There are many state and federal sources of funding that may be available to support digital teaching initiatives, such as the implementation of Whiteboard.fi in your district. Some potential sources of funding include:

1. *State departments of education: Many states have dedicated funds for the purchase of technology and other resources for schools, which may be used to support the implementation of digital teaching initiatives.*

2. *Federal Department of Education: The Federal Department of Education often provides grants and funding opportunities for schools and districts looking to implement digital initiatives. These may include programs such as the EdTech Grants program, which provides funding for the purchase of technology and professional development for teachers, ConnectED, and the Title II -program*

3. *Private foundations: There are a number of private foundations that provide grants and funding for digital teaching initiatives. These may include foundations focused on education, technology, or a particular subject area (such as math or science).*

4. *Private companies: Some private companies may also offer funding or other resources to support the implementation of digital teaching initiatives in schools.*

5. *Professional organizations: Professional organizations in education or technology may also offer funding or other resources to support the implementation of digital teaching initiatives.*

It is important to note that funding sources and requirements may vary by state and district, and it may be necessary to do some research to identify the most relevant and appropriate sources of funding for your specific needs.
